

Contents

1. INTRODUCTION	7
2. WIND ENERGY BENEFITS AND INPUTS	9
2.1. Life cycle stages of wind energy systems.....	10
2.2. Effects of a wind farm life cycle	11
2.2.1. Environmental effects	11
2.2.2. Energy effects.....	13
2.3. Life cycle effect indicators	15
3. ECO-ENERGY ASSESSMENT OF A WIND FARM'S LIFE CYCLE EFFECTS – MODELS AND ASSUMPTIONS	19
3.1. Characteristics of materials and structural elements of a wind farm	19
3.2. Indicators of wind power development	22
3.2.1. Indicator of efficiency development.....	23
3.2.2. Integrated efficiency indicator	25
3.2.3. Integrated efficiency indicator from environmental inputs	30
3.2.4. Integrated efficiency indicator from energy inputs	33
3.3. Scope of study and analysis.....	34
3.4. Energy-material (benefits and inputs) life cycle balance	37
3.4.1. Materials and resources.....	38
3.4.2. Energy Demand.....	42
3.4.3. Productivity	42
4. ANALYSIS AND ASSESSMENT OF A WIND FARM'S LIFE CYCLE EFFECTS	43
4.1. Identification of environmental effects.....	43
4.1.1. Characteristics of impacts	43
4.1.2. Normalizing.....	53
4.1.3. Identification of the impact areas	63
4.1.4. Characterization of the emissions of carbon, sulfur and phosphorus oxides	93
4.2. Description of energy impacts.....	96
5. ECO-ENERGY ANALYSIS AND THE EVALUATION OF A WIND POWER PLANT'S ECO DEVELOPMENT	98
5.1. Ecological aspects	98
5.2. Energy aspects	104
6. CONCLUSIONS	106
